Rich,
Here are the excerpts you requested.

Regarding warranty claims and coverage (new text in bold):
§1068.110: Clarify that the manufacturers' warranty obligation includes all expenses related to diagnosing and repairing or replacing emission-related parts. This is not intended to include incidental expenses (such as replacement units during warranty service), consequential damage (such as damage caused by engine malfunction), or opportunity costs (such as foregone revenue from engine downtime).

Regarding the cross-over certification (simply):
We are proposing to add a new section 90.913 to better define the responsibilities for manufacturers choosing to certify their engines below 19 kW to the emission standards for Large SI engines in 40 CFR part 1048.

Let me know if I can follow up on these things or clarify anything else.

Glenn and I are leaving today at about 3:00 for our trip tomorrow, so it would be great if you could get back to us before that. If not, we'll pick things up Friday morning.

Thanks much.

Alan
